Jennifer,

Attached is a list of the permitted facilities you wanted to review with my determination (so far) of inspections and enforcement actions that have occurred during the approximate period October, 2010 – present.

In the U.S. Steel Minntac Tailings Basin case, the current enforcement action (Schedule of Compliance) terminated a previous enforcement action (Schedule of Compliance) which preceeded October, 2010 but because that action remained in effect until the current Schedule of Compliance was executed (6-9-11) and is therefore subject to review.

Do you also want a list of the permits that have some type of compliance schedule within them with deadlines that occur during the period of review?

John
